Goldratt Research Labs

Key to getting
the initiative
done

When Eli
heard – he got
very excited
and offered to
personally
engage

Some hesitation to
talk to “another
expert”....

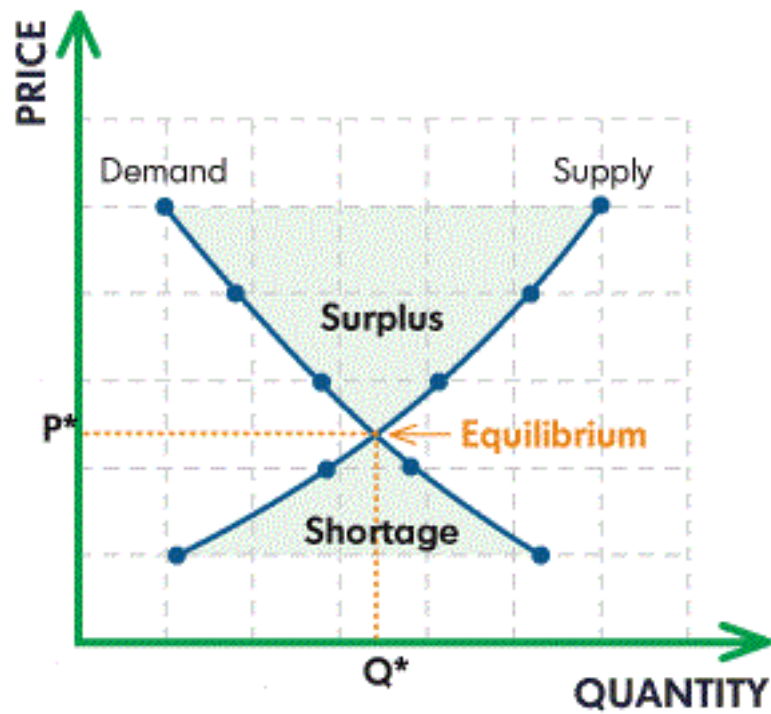

“This problem is
endemic to the
Publishing Industry”

The call with Alan was
a turning point.

No talk of technical
solutions.

Just insightful
questions

Now with
case study
interviews

THE GOAL

A PROCESS OF ONGOING IMPROVEMENT

20th Anniversary Edition

Eli Goldratt has been described by *Fortune* as a “guru to industry” and by *Business Week* as a “genius”. His book, *The Goal*, is a gripping fast-paced business novel.

“Goal readers are now doing the best work of their lives.”
Success Magazine

“A factory may be an unlikely setting for a novel, but the book has been wildly effective...”
Tom Peters

THE BEST-SELLING BUSINESS
NOVEL THAT INTRODUCED THE
**THEORY OF
CONSTRAINTS**
AND CHANGED HOW
AMERICA DOES BUSINESS

**OVER 3 MILLION
BOOKS SOLD!**

THIRD REVISED EDITION

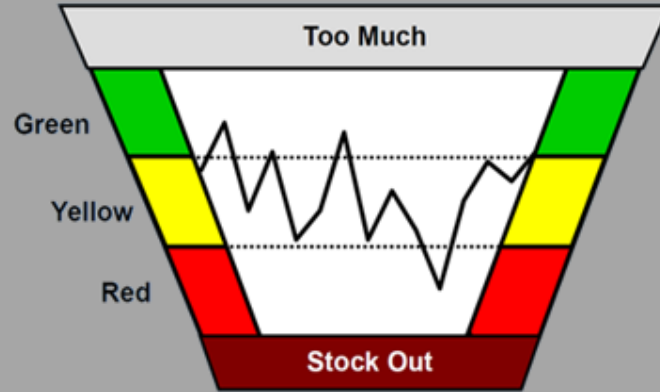

Rounding to a full carton

Minimum order quantities

Increased the cycle time

Insight: Surplus vs Shortages

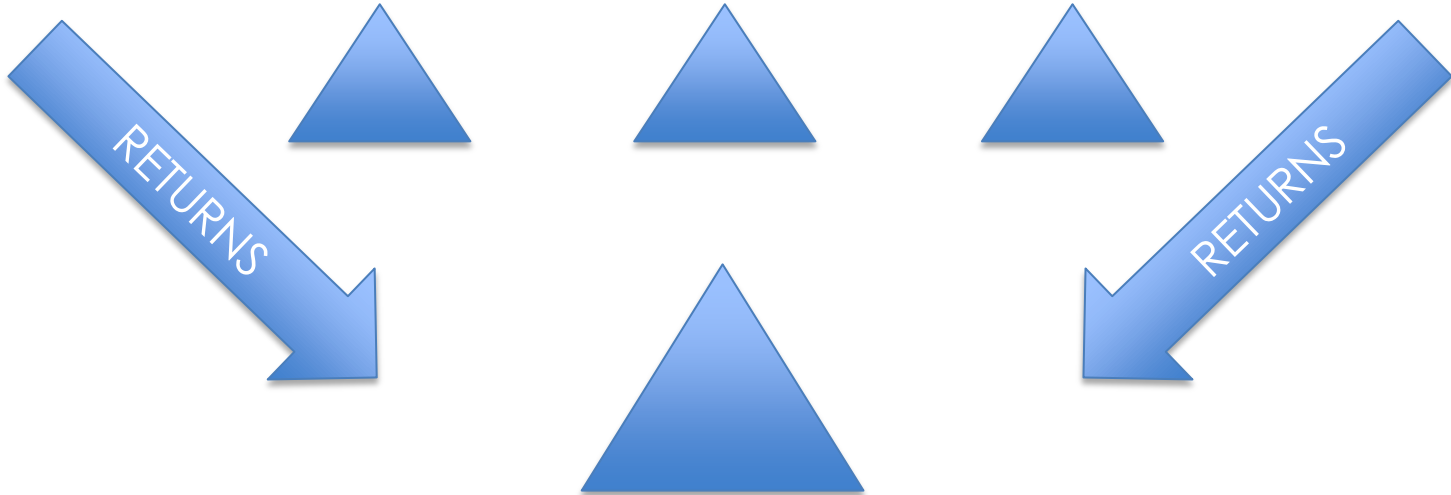

For a book store, shelf space and cash are the main constraints

Retailers

Distributors

Was the impact of stock-outs –
especially on the faster runners - greater
than the cost of the returns?

Ignited a passion within a group of
Supply chain leaders.

Was there a shortage problem in
addition to an overstock problem?

Engagement with Eli

Meeting in Amsterdam

May 2008

The Problem

Re-order frequency was inconsistent and long
(weekly at best)

Shipping policy was “minimum quantities”

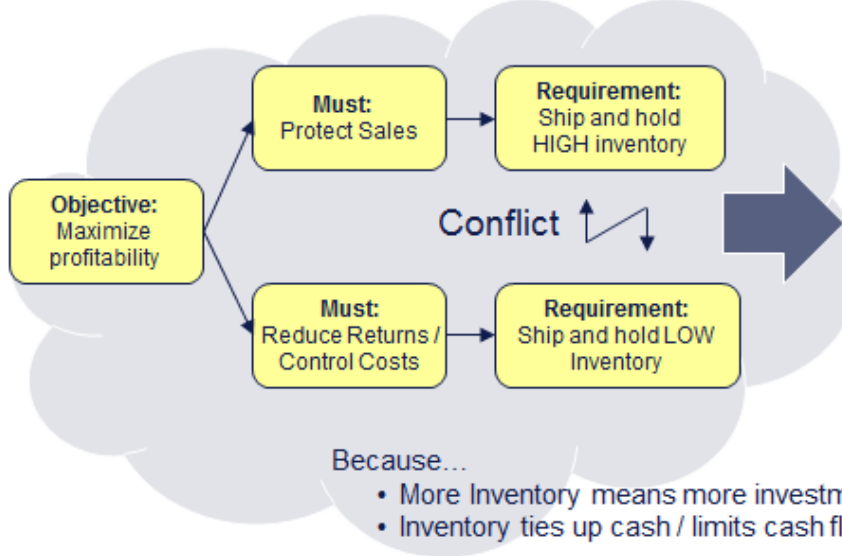

“Push” policy from sales
“pile ’em high... watch’em fly”

Small quantities on hand at retail per SKU

We identified our core conflict and potential solution

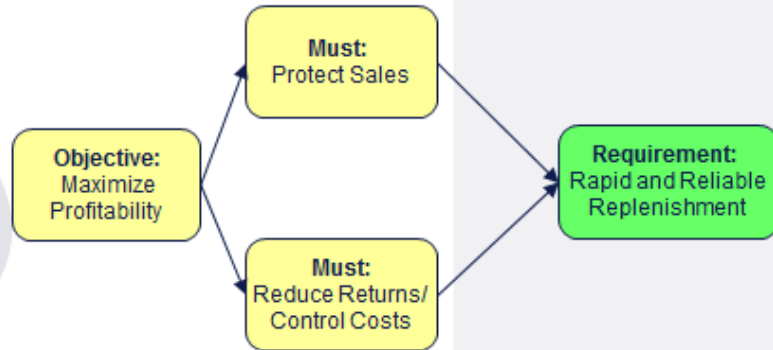

Because...

- Replenishment time is long
- Demand cannot be accurately predicted

Rapid Replenishment will protect sales because...

Books get back to shelf quickly, preventing out of stocks

Rapid Replenishment will reduce returns because...

Less inventory is required to protect sales

Consumption Based Replenishment

Customer Order more frequently
(daily what was sold that day)

RH Ship daily what was ordered (if possible)

Develop logic for “optimal on hand quantity at store”

Eli is super excited and motivated (cares about the industry personally)

But - need to prove this to rest of leadership team / others in org....

“We have been living this for decades...”

Pilots

on the shelf/in
DC

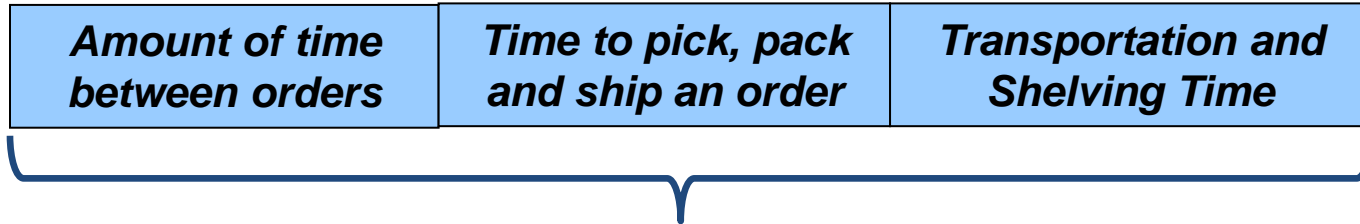

Rapid and Reliable Replenishment Time

The background of the image features a stylized American flag with red and white horizontal stripes and a blue field with white stars. Overlaid on the flag are several vibrant fireworks exploding in the night sky. A large, bright red and white firework is the central focus, with many smaller green and yellow fireworks visible in the lower left and other areas. A white circular text box is positioned in the upper right quadrant.

Eli pushed
for
immediate
pilot
launch

Agreed to Launch Pilots in late August

**“good” results – In stock
rate was almost 100% (vs control
group)**

**BUT sales were DOWN compared to
previous periods (better than control
group)...**

Case for the Sorter

Customers
order more
frequently

Pick (smaller
quantities) and
Ship more
frequently

"Efficiencies
will go down"

Cycle time will
go up

Implement
sorter

Cycle
time will go
down

Create more
throughput
capacity

2017

In the mean time...
Our focus was elsewhere...

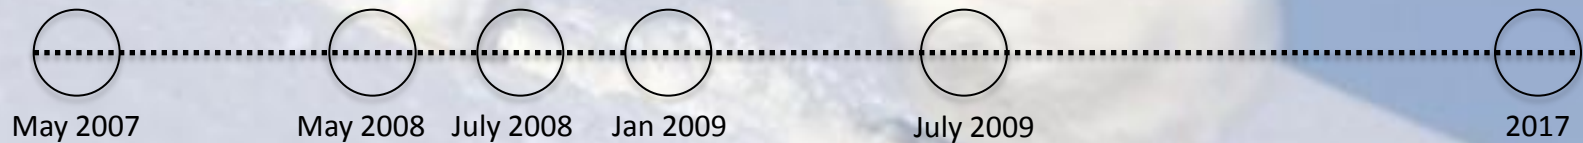

Need to validate:

1. Can we do it at Scale?
2. Can store order differently for one publisher?
3. Will Dynamic Buffer Management work?
4. Will returns go down?

Here we saw the results Eli was
expecting in the first place!

GREAT SUCCESS!

Snowball...

What we did

Convince Me!

Convince People

customers,
executives,
sales,
operations

Physical Changes

Warehouse, sorter, shipping

Information System

Really understand the math

Light guidance on how to do it in SAP

Got daily POS and ending inventory

We refined our solution around TWO central themes:

Work to improve R³ Time with a Customer

Implement Dynamic Buffer
Management

Today:

60% of volume is daily orders

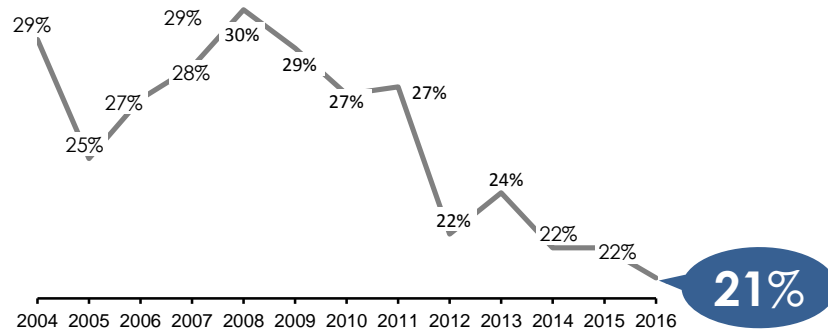

80% rapid, reliable replenishment

20% of volume replenished using DBM

US Return Rates

US Physical Dollars Return %

— Random House

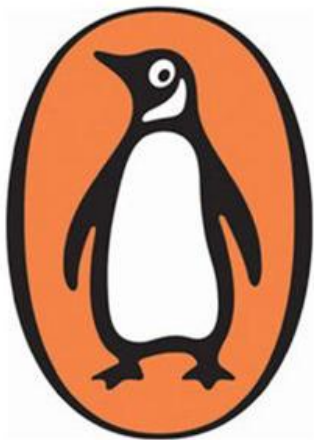

In-stock rates
for customers with DBM
up 3-6%

Sales increases hard to
quantify as there was a
shift to digital and on-line
sales - 1% improvement in
sales

**Emergency
Replenishment
from
25% → 3%**

Publishers Offer Rapid Replenishment Programs

Posted on Wednesday, Dec 02, 2015

[Printer-friendly version](#)

[Send by email](#)

Several major publishers are once again offering expedited shipping to indie bookstores this holiday season and, in some cases, beyond. Here's a look at previously announced programs from Hachette, HarperCollins, Macmillan, Penguin Random House, Perseus, and Simon & Schuster.
